CooperCraft Communications named an approved provider in the GTA Direct IT services program

CooperCraft Communications has entered agreement with the Georgia Technology Authority to make available Structured Cabling to Georgia government entities via the GTA Direct IT services program. Effective 10/26/2020, CooperCraft Communications is a GTA-approved service provider, and state government entities can access top-quality IT services through the contract.

The GTA Direct program provides a quick path to managed IT services for Georgia agencies, local governments, colleges and universities, and boards of education statewide. That's everything from computing services to telecommunications and network services, wireless services, hosted contact center services, and more. Customers can choose from a provider's standard catalog or request a custom quote. GTA qualifies the vendors and provides light governance over the contracts, and then agencies can purchase services directly from the providers. It eases the burden of procurements for agencies, allows them to capitalize on the state's purchasing power and gives them access to contracts tailored to government.

Structured Cabling refers to a wide range of wiring subsystems. Put simply, a structured cabling solution is designed to support many types of hardware systems to help companies communicate quickly and efficiently.

CooperCraft is ready to install your vital lines of communication - whether you're looking to upgrade existing infrastructure or design a new one. CooperCraft has extensive experience with cabling infrastructures for commercial, industrial, healthcare, and institutional environments.

Services:

- Voice/Data Cabling Services
- Rack and Closet Construction
- Fiber and Copper Backbones
- Structured Cabling Design
- Communication/Data Center Clean-up
- Aerial/Underground Copper and Fiber Placement

The Georgia Technology Authority is a state agency that manages the delivery of IT infrastructure services to Georgia's executive branch agencies, as well as managed network services to 1,200 state and local government entities. GTA also offers public entities access to standardized contracts with a pool of industry-leading IT providers.

CooperCraft Communications was founded in 2002 with a primary goal of being able to provide the marketplace the highest quality integrated solutions and best-in-class customer service. CooperCraft specializes in the installation and upgrades of both new and existing:

Network Cabling Infrastructure
Life Safety Systems
